

Patient Registers, 1826-1963

AC 49

Ca. 140 c.f. (207 oversized volumes in 70 cartons)

Accession number: 1999-10

Acquisition:

The volumes were rescued from storage on skids in the basement of the Resident Physician's House in 1999.

Condition:

The volumes are in poor condition because of red rot, dilapidated bindings, and warped boards.

Access:

The volumes are subject to restricted access. Consult the Archivist and Curator for further information.

Description:

The volumes are lumped together in AC 49 because they are for the most part sequentially numbered on their spines. But some volumes pertain to MGH, while others pertain to the Massachusetts Eye and Ear Infirmary. Others are labeled Baker House and Phillips, divisions within the MGH. Additional description accompanies batches of volumes on the list where appropriate.
