Acquisition: The papers were left by Edward F. Bland, MD, in the custody of Guillermo Sanchez, MD, who in turn entrusted them to Peter Yurchak, MD. Dr. Yurchak transferred custody of the material to the MGH Archives and Special Collections on June 29, 2006.

Access: Portions of the collection may be subject to restricted access because of patient confidentiality. Consult the Archivist for further information.

Copyright: Requests to publish materials from the collection should be directed to the Archivist.

Processing Note:

Materials received from Peter Yurchak have been separated into categories during processing, as follows: Official records of the MGH Cardiology Division, and related departmental, laboratory, and clinical materials, including patient records such as ECGs, have been moved to AC 47, Records of the MGH Cardiology Division, in the MGH Archives and Special Collections. Teaching slides prepared and used by Paul Dudley White have been moved to MC 12, Papers of Paul Dudley White, MD, in the MGH Archives and Special Collections. A signed and inscribed mezzotint of Paul Dudley White has been added to the MGH Portraits Files in the MGH Archives and Special Collections.

Slides (personal, medical, and teaching), which were originally in an oversized and half empty steel slide cabinet, have been removed from the cabinet and re-housed in Mylar slide sleeves in the same order they were arranged in the cabinet. Identifying post-it notes and dividers were inserted into the Mylar sleeves to indicate their placement in the cabinet. The cabinet contained some loose slides and dividers, suggesting that the original scheme might have been disarranged and some slides may have been removed prior to the accession of materials into the Archives.
